## My Vision (By failing to prepare, you are preparing to fail. Benjamin Franklin)

After all of these years, I have worked on different companies and several projects and I've learnt two important things: keep it simple and learn from your mistakes, or in other words "move fast and learn things".

Learning new technologies and challenge my capacities every day is what motivates me. There is no problem on trying and failing, but you must improve at every step of your career so you do not fail again.

The key of a project is the team, and an organized and motivated team is the key of success. I like managing people and projects while lead them to success.

I think training and coaching junior profiles so they grow with solid knowledge about best practices in particular languages and architectural concepts is very important for a company and this is why I always use part of my time to train people and spread the knowledge inside the company.

## Experience

**Everis Spain** - Solutions Knowledge Leader  
[www.everis.com](http://www.everis.com)

**Jan 2017 - Present**
